

LOGOS.

Software Solutions For Logistics

LOGOS WMS Enterprise

Fully integrated to your SAP® system.

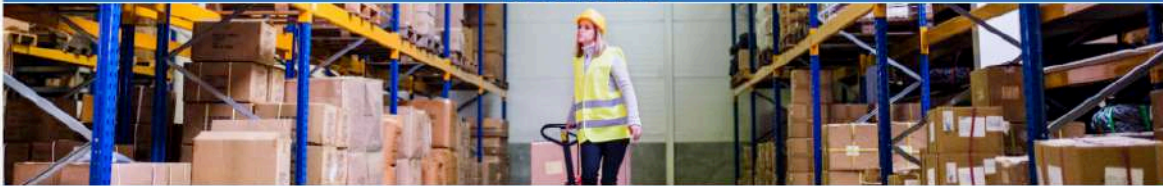

LOGOS WMS

Works completely standalone or can be connected to your ERP solution.

Our fully scalable solutions offer rich portfolios of modules to drive efficiency, accuracy and cost control within your warehouse.

RECEIVING

KEY FEATURES

- Perform goods receipts for PO's (internal & external vendors) via RF device
- Receive against Advance Delivery Notice
- View material specific information via RF device (Hazard, Storage Information, Quality)
- Printing material hazard labels
- Handling unit creation and management
- Perform put-away via RF device

KEY BENEFITS

- Cut double handling by utilizing cross dock processes
- Improve PO receipt time & accuracy with processing via RF technology
- Consolidate transactions
- Better operator awareness of Material Hazard Information

LOGOS.

Software Solutions For Logistics

SHIPPING

KEY FEATURES

- Integrated shipping monitor consolidates transactions
 - Delivery Management
 - Transfer Order Management
 - Packaging Functionality
 - Update carrier & freight information in delivery
 - Shipment Management
 - Print Shipping, Content and Customer Specific Labeling
 - Print Shipping Documentation (BOL, Delivery Note, COA, MSDS etc.)
- Interface with technical equipment
 - Conveyor systems, Scales, Sorters
- Picking via RF device (or Pick & Pack)
- Packing via RF or monitor
- Shipping zone and dock monitor
- Warehouse monitor for time and temperature sensitive handling
- Carrier / small parcel interface (ex. FedEx and UPS)
- Returnable Container Management (ex. Totes)
- Ability to incorporate RFID processing
- User processing metrics and reports

KEY BENEFITS

- Improve shipping/billing accuracy by having an integrated system for processing and updating data with your ERP system
- Decrease processing times through real-time data posting
- Error proof shipping by utilizing bar code or RFID technology
- Packaging monitor simplifies and enhances packaging functionality
- Better load visibility for shipping dock organization and management
- Consolidated Goods Issue processing for deliveries

Software Solutions For Logistics

PRINT SYSTEM

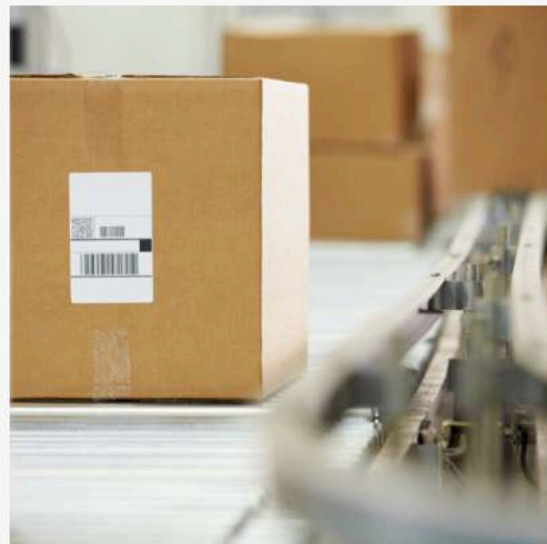

KEY FEATURES

- User-friendly label layout design software (print engine)
- Company logos and graphics can be incorporated
- Utilize existing label design and print engines (if compatible)
- Label data requirements can be stored and retrieved from the LOGOS WMS database, customer's ERP system (for example SAP®) or can be manually entered by the user (or any combination)
- Label data can include hazard information (incl. pictograms), customer specific information, batch / specification information, etc.
- Module can be integrated to other applications such as print and apply and high speed automated packaging systems
- Labels can be triggered from an RF device, desktop or your ERP solution

KEY BENEFITS

- Integrated system reduces multiple entries, decreasing potential for errors
- Printing labels on-demand with real-time data improves business process flow and accuracy
- One common system to print all processing labels, documents and reports
- Labels can be printed to your preferred printer hardware (includes color)

Software Solutions For Logistics

WAREHOUSE EXECUTION

KEY FEATURES

- Bin Optimization techniques
- Combine put-away and pick tasks to eliminate dead heading of forklifts
- Priority processing management
- Pick Strategies
 - Pick & Pack
 - Pick-to-light
 - Pick-by-voice
- Replenishment (deep stock to pick locations)

KEY BENEFITS

- Increase warehouse capacity by optimizing bin space
- Decrease labor & warehouse traffic by optimizing material handling
- Gain efficiency by combining pick & pack functionality
- Integrate conveyor systems, scales, sorters and other automation equipment
